## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**Claim 37** is rejected under 35 U.S.C. 102(e) as being anticipated by Korovin et al. '903.

Korovin et al. discloses a method of planarizing a microelectronic substrate, comprising: biasing the microelectronic substrate against a planarizing medium with a flexible membrane to exert a first force on a first part of the microelectronic substrate and exert a second force greater than the first force on a second part of the microelectronic substrate, the substrate being held stationary relative to the membrane as the substrate is biased against the planarizing medium; and moving at least one of the microelectronic substrate and the planarizing medium relative to the other to remove material from the microelectronic substrate.

### ***Allowable Subject Matter***

**Claims 38-40, and 42-47** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**Claims 48 and 50-53** are allowed.

### ***Response to Arguments***

Applicant's arguments with respect to claims 37-40, 42-48, and 50-53 have been considered but are moot in view of the new ground(s) of rejection.
